

75mm x 12.5mm x 4mm diameter
GALFAN + Powder coated

High Security Fence Installed somewhere deep in
Middle East.
GALFAN 95/5 + ORANGIC POWDER coating
added life span.

In a Middle East location near coastal

BARGO - adapting the ORIGINAL
GALFAN 95 Zn /5 AL Coating.

95/5 is the chemicals composition originated from GALFAN. Everyone now claim their coating is 95/5. If by adding 5% of Aluminum into the Zinc pool would mean a 95/5 GALFAN standard, than don't see why major established Licensees should folk out big money to get the licensee along with the expensive equipment.

We draw and galvanized our wires and tubes. We manufacture all under ONE roof and *we are Licensee of GALFAN since 2001.*

Others talk about their improved 95/5 but did not mentioned what is that improvement and what machineries they had added. After all 95 + 5 is already 100%.

We adopt the latest improved version of GALFAN and BARGO is a **MISCHMETAL** grade/class product.

DOUBLE TORSION WIRE NETTING				
Arrange No	Area of use	Reference standards for the product	Reference standards for the coating	Type of fillet (mm)
1	Zinc coating Class A			
2	Zinc-aluminium coating type Zn95Al5 Class A with "mischmetal"			
3	PVC organic coating on the Class A zinc coated wire	NF EN 10223-3 NF EN 10218-2	NF EN 10244-2 NF EN 10245-2 NF EN 10245-3	60/80 80/100 100/120
4	PVC organic coating type Zn95Al5 Class A with "mischmetal"			
5	PE organic coating type Zn95Al5 Class A with "mischmetal"			

This decision cancels and replaces any previous decision.

Standard / Quality - *Basic Standards* - (BS EN 10244-2class A) (BS EN 10245-1-part 1) (BS EN 10218) (BS EN 10223) - more available on request

BARGO being a true GALFAN will not compete by offering alternatives grades of coating (example High, Medium or Low coating GSM) - we have only ONE type; the best and the maximum (example min 250 GSM for a 4 mm diameter wire). So make sure you are NOT paying 24K price for a 14K quality. After all BARGO cost about 8% more than a similar mesh in Heavily Zinc Galvanized.

Retaining wall (GALFAN Coating)

MISCHMETAL Grade - **BARGO**
 mesh for installations beyond Desert and Coastal line.

Coastal Fencing (Port)

Fully computerized fencing system with Integrated Auto gates, CCTV Post/cameras and sensors

Double Mesh Fencing (GALFAN + Powder Coating).

High security Border Barrier with a 6MT gate
