

DRAGGO is an **Anti Intruders Mesh (AIM)**. It is an improve version and our 3rd generation types of ANTI CLIMB MESH. It not only an ANTI CLIMBS for terrorist, it Anti anyone who tries to intrude.

DRAGGO Stainless Steel – is our latest addition to security barrier.

It does not have any welded joint, hence it eliminates corrosion and rust arises from welding. Life span of the product is therefore extended.

The new Barb design is more aggressive, stronger and more pricking exposure per frontage, making it an effective deterrent to intrusions.

This product is most suitable for use as security barrier or security fences in areas which require high security e.g. Prisons, military and police installments, power, gas and oil facilities.

Material – Stainless Steel

For elegant placement around neighborhood or for longer lifespan / dignitaries' installation, Stainless Steel is best recommended.

It is not expensive as it may be – come check with us.

Material – Mild steel

Low carbon steel conforming to JIS G3131/SPHC.

For Anti-corrosion, it can be hot – dipped heavily galvanized to BS Standard, powder-coated or HOT DIP heavily PE/PVC coated.
